All bearing loads are based on evenly distributed loads.

EUR2 Euro pallet

EUR6 Euro pallet

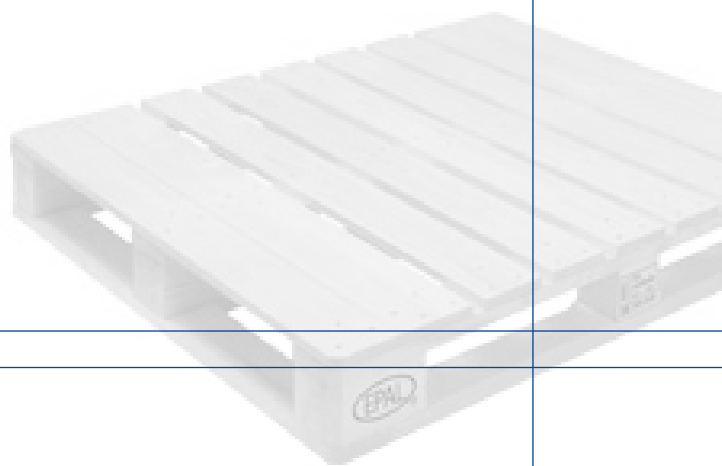

- Supplements the classical EUR 1 with new products: EUR 2 and EUR 3 industrial pallets sized 1,000 x 1,200 mm, and the EUR 6 half-sized pallet 600 x 800 mm
- The EUR 2 Euro pallet is designed as a floor frame pallet and may be transported on chains or roller conveyors. With its three bottom deckboards, the EUR 3 corresponds to the conventional design of the EUR 1 pallet.
- Standardised pallets, bearing the EPAL seal of quality
- Exchangeable pallets in a European-wide exchange system
- Robust versions: high bearing loads for heavy goods
- Combinable with rigid or collapsible stacking frames and pallet lids in special sizes

# Euro pallets EUR2, EUR3, EUR6

The Palettenboerse offers its clients a varied and high-quality range of products for a wide scope of application in trade, industry, and logistics.

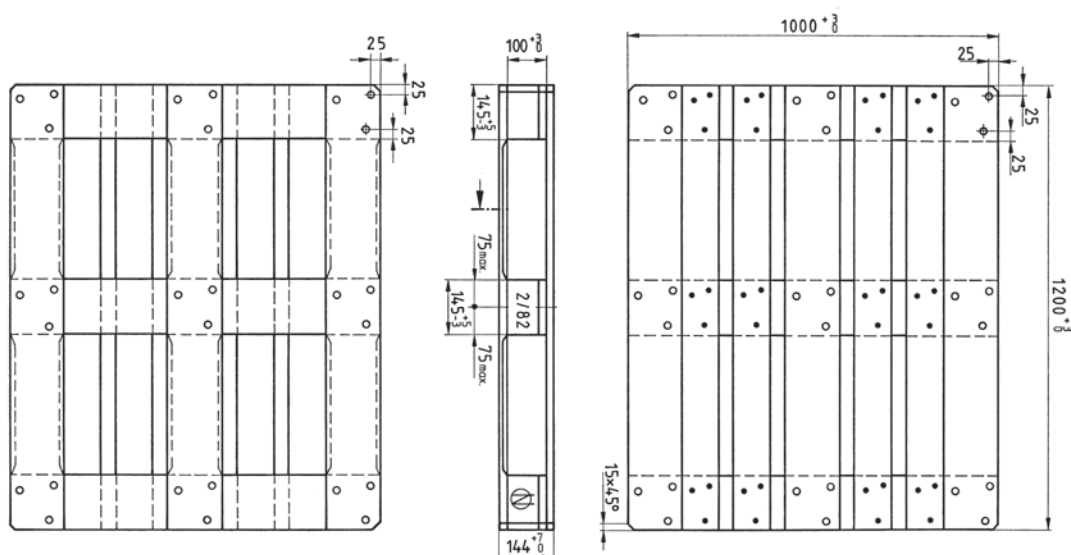

The broad product range stretches from exchangeable pallets with standardized measurements – 600\*800, 800\*1000, and 1000\*1200 mm – to reusable and one-off pallets with individual meas-

urements, as well as to special pallets, which are developed and produced – also in small batch series – according to the specifications of our clients. In this process we only use high-quality raw materials, by request even recycled materials or alternative materials as OSB.

All our pallets are produced with up-to-date production technology. In order to

ensure the consistent high quality level of our products we conduct regular quality controls along the whole production process.

By request, all our package items are available as “export version” – bearing the IPPC symbol. The heat treatment (HT) process complies with the regulations of the ISPM 15 standard.
